GENERAL REMARKS ON THE MONTH.

The month opened with mild and wet weather. The first two days accounting for nearly the whole RF of the month. Some very fine days occurred at intervals. The last fortnight proved very cold often with a cutting wind - On the night of 31st some flakes of snow fell which balled up to balls of 1 or 1½ in diameter possibly caused by wind rolling the flakes together on the ground

3 -DEC 1907

Dear sir. I have been in London for this week end. & so have got behind dont know My way quick enough to reach Camden Square. in the Limited time I had Yesterday: got fine Weather & kept in the City all day. & got home last night in a good Humour.

My formal Post Cards are all used or spoiled. thence this every day form

we have lifted all our Root Crops now. & they have come out "grand" we have plenty of everything this year but Honey & it is a very short Crop. but there is not much depends on it.

Hoping you have got. Satisfaction Pleasure & Profit. from your Garden & bright prospects for another season I always like this season of the Year one's Mind feels more free. Satisfied with results of work well done. at the same time raised with hope & expectation. of even better results and returns next year. I am Sincerely yours

J Masson

FORM A2.
BRITISH RAINFALL.

7 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Lywood House at gap Ardingly

in the County of Sussex

by G. F. Scott

RAIN GAUGE
Pattern "Howard"
Diameter of top 5 in.
Height of top above Ground — ft. 9 in.
" " " Sea Level 240 ft.

Time of Observation 9 · A.M.

Nearest Railway Station
Name Horsted Keynes
Distance 1½ M. Direction ENE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

-3 JAN 1911

Kept at Stockcroft, Balcombe
in the County of Sussex 4
by R. Newton

RAIN GAUGE
Pattern Symons
Diameter of top 5 in.
Height of top above Ground 1 ft. 1 in.
" " " Sea Level 341 ft.

Time of Observation 9 a m

Nearest Railway Station
Name Balcombe
Distance 1m Direction S

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Dr H. R. Mill

Dear Sir

Kindly delete the rainfall entered for 20 Nov last I find on reference to my book the error was made in transcription – there was no rain on that date here

Yours faithfully
G. J. Warren

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

JOHN T. BICKFORD,
SECRETARY AND MANAGER.

ALL COMMUNICATIONS TO BE
ADDRESSED TO THE SECRETARY.

NEWHAVEN AND SEAFORD WATER COMPANY,
CLAREMONT ROAD,
SEAFORD, SUSSEX.

Monday, 6th March, 1911.

Dr. Mill,
British Rainfall Organization,
62 Camden Square, N. W.

Dear Sir,

I am much obliged by your letter of the 3rd inst. pointing out two errors in my return, owing to mistakes in copying and carelessness in checking. The figures 0.03 and ~~4.96~~ 5.96 are the correct ones.

I am sorry you have been put to this trouble.

Yours faithfully

John T. Bickford
Secretary.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

3 JAN 1911

Kept at Dalkeith, Bognor

in the County of Sussex

by H. L. F. Guermonprez

RAIN GAUGE
Pattern Snowden
Diameter of top 8 in.
Height of top above Ground 1 ft. 0 in.
" " " mean Sea Level 21 ft.

Time of Observation 9 a. m

Nearest Railway Station
Name Bognor
Distance ½ mile Direction N.W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

BRITISH RAINFALL.
26 JAN 1911

REGISTER OF RAINFALL IN 1910

~~A~~ D85.

at Bolney Vicarage

County of E. Sussex 3

Rev T. A. Holcroft. J. Hodgson

RAIN GAUGE	Pattern	
	Diameter of top	in.
	Height of top above Ground	ft. in.
	„ „ „ Sea Level	ft.

Time of Observation

Nearest Railway Station: Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Enclos. 6th. January 1909.

Dr. H. R. Mill
62 Camden Square
London. N.W.

Dear Sir

I enclose herewith rain gaugings at my various Stations and I would point out that in all cases the gaugings on December 28th. & 29th., I do not consider correct as the wind was so high when the snow was falling and the snow was so exceedingly small that it was blown out of the gauges and nothing like the quantity that fell was got into the gauges. This opinion is confirmed by the fact that in several places in the open in the neighbourhood of these gauges I measured the snow myself to be 8" deep and this was not where the snow had drifted.

With reference to the gaugings at our Goldstone Bottom Works, I had an unfortunate experience on the 9th. October last for we found that someone had climbed into the works and had stolen the gauge. As rain fell during October 8th., at other Stations I think a small quantity would have been registered by this gauge had it been left alone. The gauge was, of course, replaced by a new one on the 9th. October.

Yours truly

Jas: Johnston

Waterworks Engineer.

Dear Sir

I have considered your letter of the 4th. inst., with reference to the rain gaugings at Mile Oak Works and Goldstone Bottom and I quite agree that the corrections you suggest should be made, i.e., December 28th. & 29th., at Goldstone Works add .50 inch, October 8th., add .07 inch, Mile Oak Works, December 29th., add .40 inch.

Yours truly

Waterworks Engineer.

Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
4 JAN 1910

Kept at Buxted Park

in the County of Sussex

by H. C. Prinsep

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 94 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Buxted
Distance 1 Direction N. E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

BRITISH RAINFALL.

14 FEB 1911

REGISTER OF RAINFALL IN 1910

Kept at Chelwood Beacon

in the County of — Sussex 7

by D. Cox gardener to Sir H. B. Jervoise B^t

RAIN GAUGE
Pattern
Diameter of top 5½ in.
Height of top above Ground 1 ft. 3 in.
" " " Sea Level ft.

Time of Observation

Nearest Railway Station
Name Forest Row
Distance 5 mi Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
3 JAN 1911

Kept at Watergate

in the County of Sussex

by Wm. M. Christy

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 240 ft. in.
" " " Sea Level 1 ft.

Time of Observation 9·0 AM

Nearest Railway Station
Name Rowlands Castle
Distance 4½ Direction West

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 430 ft. about
Time of Observation 9 am
Nearest Railway Station: Name Grange Road
Distance about 600 yds Direction N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Distance 4 Direction W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
3 JAN 1910

Kept at Fenlington
in the County of Sussex
by John Anderton Greenwood

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 95 ft.

Time of Observation 9 A M.

Nearest Railway Station
Name Bosham
Distance 2½ Direction S.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
4 JAN 1910

Good Amp

Kept at [illegible] - Groombridge

in the County of Sussex

by Mr Boardman

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 320 ft.

Time of Observation 10 A. M. daily

Nearest Railway Station
Name Groombridge
Distance 1 mile Direction N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Time of Observation

Nearest Railway Station { Name
Distance .... Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

TELEGRAMS FERNHURST,
STATION HASLEMERE.

BLACKDOWN HOUSE,
FERNHURST,
SUSSEX.

28th July 1904

Dear Sir

During February March and April last year I was in South Africa and did not examine my weather charts and reports entirely after my return. The clerk of the works who has kept them for me for twelve years is usually very careful and accurate

I find however that from the 13th to the 31st March 1903 he has copied the figures in column wet bulb thermo: instead of the rainfall. This I have filled in your form, the quantity for the period being 1·98

Yours very truly
F. S. Philipson Stow

H. R. Mill Esqre

P.S. I regret the error. The Clerk of the Works wishes me to apologize for it –

PARCELS} STATION} HORSTED KEYNES.

BROOK HOUSE,
HAYWARDS HEATH.

Jan 5th.

Dear Sir

As I was advised, I move my rain gauge this last year immediately after the new year, & the height was taken 250 ft above the sea. Where it was before, it was surrounded by trees & the

house, and although the
angle was greater than
necessary to the rules; in
case of gales, it might
have been slightly protect
The past twelve months it
has been perfectly open
ground.

Yours truly

Harvey R G Clark

FORM A2.
BRITISH RAINFALL.

16 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Franklynn Rd. Haywards Heath

in the County of Sussex 4

by R Inglis

RAIN GAUGE	Pattern
	Diameter of top 5 in.
	Height of top above Ground 1 ft. — in.
	" " " Sea Level 260 ft.

Time of Observation 8 AM.

Nearest Railway Station { Name Haywards Heath
Distance 1 mi. Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Name Wadhurst
Distance 1⅞ Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

BRITISH RAINFALL.
SYMONS'S METEOROLOGICAL MAGAZINE.

HUGH ROBERT MILL, D. SC.

Telephone: P.O. Hampstead 942.

62, Camden Square,

London, N.W.

April 12th, 1910.

H. A. James Esq.

Dear Sir,

On examining the rainfall return for last year which you have been good enough to send me, I notice that the measurements have been uniformly entered on the register as the rainfall of the day on which the reading was taken. As you will observe by Rule IX of the enclosed pmmphlet it is the custom for all observers to enter the fall measured each day to the previous day, thus bringing the measurement made at 9 a.m. on the first of each month in to the previous month. Of course there is no harm in entering the reading to the day on which it is made, but as it is very desirable that all the records should refer to exactly the same period, I should be glad if you would be good enough to let me know the amount you measured on the morning of January 1st, 1910 so that your record may not be out of harmony with others.

With apologies for troubling you,

Yours sincerely,

Hugh Robert Mill

R.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL. 19 JAN 1910

Kept at ~~Whitedale~~ Herstmonceux Place

in the County of Sussex

by Henry Ashworth James

RAIN GAUGE Pattern

Diameter of top 5 in.

Height of top above Ground 1 ft. 8 in.

" " " Sea Level 83 ft.

Time of Observation 9.30 am

Nearest Railway Station Name Hellingly

Distance 4¼ Direction West.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Time of Observation 8·15 a.m

Nearest Railway Station
Name Horeham Road
Distance 440 yds Direction N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.
26 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Horsham Richmond Rd

in the County of W. Sussex 2

by M. L. Craven Esq L. E. Whitting

RAIN GAUGE
Pattern
Diameter of top in.
Height of top above Ground ft. in.
„ „ „ Sea Level ft.

Time of Observation

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.
